

# RESULTS JUNKIES 2018 PEORIA VISIT

## APRIL 30 – MAY 2

---

*Paul Singh and the Results Junkies will be visiting with Peoria's entrepreneurs, educational institutions, government leaders, economic development organizations, and established businesses, during a three-day conference in 2018.*

---

"The real goal of the Tech Tour is to bring functional expertise and venture capital dollars to parts of North America that don't regularly get the same amount of attention as the well-known tech hubs," Singh said.

Singh is an entrepreneur, speaker, investor, and Airstreamer. Previously, Singh was a managing director at 1776 and a general partner in 1776's Seed Fund. Prior to 1776, Singh was the founder of Disruption Corporation (acquired by 1776) and general partner of Disruption's post-seed venture capital arm, Crystal Tech Fund. Before that, Singh was an early partner at 500 Startups, an accelerator and venture firm headquartered in Silicon Valley that has invested in more than 2,200 companies across 50-plus countries. Singh has founded a few of his own startups (two successful exits and a number of failures in between) and spent some time at AOL, Carmax, PBworks, and Symantec.

"This tour isn't just for companies that want to raise VC money or tech startups trying to be the next 'Uber for this or Uber for that' Singh said. "We want brick and mortar businesses, too, and those who are working on their own entrepreneurial dream. It's important to realize that technology is so interwoven into business such that every startup or entrepreneur needs to understand how to make it work for them."
